- Gold Medallist in Africa Science Week Robotics Challenge in 2020
- Most Valuable Player (MVP) in Vice-Chancellor Trophy 2020
- Pioneer Degree in Bachelor of Business Information Technology in 2020
- Best student in sciences award - Police Secondary School in 2014.
- Overall best student award – Police Secondary School in 2014.

Language Skills: English, Chichewa

Reference to Prior Work/Assignments that Best Illustrates Capability to Handle the Assigned Tasks

KEY QUALIFICATIONS:

Mr. Dennis Makwakwa is a full-stack developer. He is honest, highly motivated, and result-oriented and has manifested himself in this regard by successfully working on several projects. In addition to the aforementioned strongholds, he has extensive knowledge in accounting and business administration. He has worked as a full-stack developer for Malawi University of Science and Technology from 2017 to 2020 (internship) on various projects, for instance MUST's Human Resource Management system and MUST's Students Electronic Voting system. Furthermore, in 2021, he worked at Agile Systems as a full-stack developer where he developed various systems used across Malawi, including the MAGU administration system and student portal, and tourism systems. Mr. Makwakwa worked at LUANAR (Lilongwe University of Agriculture and Natural Resources) as a senior software engineer for the ICED ALL-IN project (Adoption of digital tools in agriculture). In addition to this, he has been part of several innovations in networking and software development projects. His research interests are in software development, green innovations, machine learning, and the Internet of Things. Dennis' passion is to be part of developing technologies in the industry of ICT that can lead to the growth of technological development in developing countries like Malawi.

RELEVANT PROJECTS:

Malawi Digisavvy is the name of the project.

Year: 2020 - ongoing

Location: Malawi

Client: Public.

Courses can be accessed from anywhere online. It has courses ranging from Advocacy Skills, Creativity Skills, Entrepreneurial Skills, Professional Skills, all the way to Event Planning Skills.

Link: digisavvy.org

Position held: Full-stack developer and trainer.

Activities Performed: Responsible for the system's (digisavvy) maintenance, install and configure software and hardware for the system, manage network servers and technology tools, Set up accounts and workstations
Monitor performance and maintain systems according to requirements, Troubleshoot issues and outages,
Ensure security through access controls, backups, and firewalls. Upgrade systems with new releases and models, Train your staff on new technologies. Creating content to deliver on the platform, delivering the content (physically or online).

Matandani Seventh-day Schools Management System is the name of the project.

Year: 2022

Location: Malawi

Client: Matandani Seventh-day Schools.

Project Description: This system allows the school to manage registration, admissions, the academic calendar, aThisdance, and more. This school management system centralises tedious school processes and significantly increases the effectiveness and efficiency of school administration.

Position Held: Full-stack Developer.

Activities Performed:

- Developing front end system architecture.
- Designing user interactions on the system.
- Developing back-end.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- designing the Interface.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.
- Meeting both technical and consumer needs.
- Staying abreast of developments in applications and programming languages.

Name of Project: ALL-IN PROJECT

Year: 2021-ongoing

Location: Malawi

Client: public (farmers and buyers).

Project Description: The Lilongwe University of Agriculture and Natural Resources (LUANAR) with support from USAID Feed the Future, through ALL-IN and UC-Davis is implementing a project on the adoption of digital technologies and platforms to improve the marketing efficiency of horticultural products in Malawi. The project is being implemented in Dedza and Mzimba south.

Position held: senior software engineer.

Activities Performed:

- Software development (mobile and web)

- API testing and implementation
- Software and hardware systems support
- web design and development
- User Requirement Identification
- User acceptance test formulation and systems Evaluation
- System design
- Database design and administration
- Training users on hardware and software operations
- Juggle multiple projects and priorities simultaneously in a fast-paced environment
- Liaise with management and clients to identify and define project requirements, scopes, and objectives. That align with project's goals
- Coordinate internal and external resources, ensuring projects remain within scope, schedule, and defined budgets
- Install, configure, and maintain computer hardware.
- Software development (mobile and web)
- API testing and implementation
- Software and hardware systems support
- web design and development
- User Requirement Identification
- Recover data.
- Closely always monitor the performance of the servers.
- Technical support and guidance.
- Routine system maintenance.
- System backup and security.
- Analyse project progress and, when necessary, adapt scope, timelines, and costs to achieve maximum benefit
- Assign roles and tasks to dedicated team members, based on individual strengths and abilities
- Build the skill sets of individual team members and capture overall learnings for the project
- Achieve project's goals while upholding standards and best practices

Name of Project: NATIONAL YOUTH COUNCIL SMS handling portal.

Year: 2021

Location: Malawi

Client: National Youth Council

Project Description: This system allows the National Youth Council to manage their routine SMS messages. The system allows the users to write the SMSes and send them on schedule or on click to specific audiences of their choice.

Link: [Nycom](#)

Position Held: Full-stack Developer.

Activities Performed:

- Developing front end system architecture.
- Designing user interactions on the system.
- Developing back-end.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- designing the Interface.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.
- Meeting both technical and client's needs.

Name of Project: Pa.mw System

Year: 2021

Location: Malawi

Client: Public.

Project Description: This is a website that encompasses many of the services found in Malawi. Its main purpose is to simplify the access to digital services available in Malawi

Link: [Pa.mw System](#)

Job Title: Full-Stack Developer

Activities Performed:

- Developing front end system architecture.
- Designing user interactions on the system.
- Developing back-end.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- designing the Interface.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.

Name of Project: Malawi Assemblies of God University Student Portal (web and mobile).

Year: 2021

Location: Malawi

Client: Malawi Assemblies of God University (MAGU).

Project Description: This system allows the MAGU to manage registration, admissions, academic calendar, attendance, accounts and more. It also allows students to access their grades, book accommodation, and vote for their student representatives, all online. and can be accessed through the [website](#).

Position Held: Full-stack Developer.

Activities Performed:
